

Modular Distribution Box Solutions

For diverse low-voltage applications

01 Mainstream Full-Featured Model

125A Enclosure: 450 × 360 mm

125A modular distribution box with MCCB incoming and MCB outgoing circuits. Provides a complete protection layout for mainstream commercial and project installations.

02 Mainstream Compact Model

160A Enclosure: 450 × 360 mm

160A compact modular distribution box for standard low-voltage circuits. Space-saving design with a clean internal layout for easier installation and maintenance.

03 Commercial Capacity Model

250A Enclosure: 450 × 360 mm

250A modular distribution box for commercial buildings and engineering projects. Supports higher distribution capacity and more flexible circuit expansion.

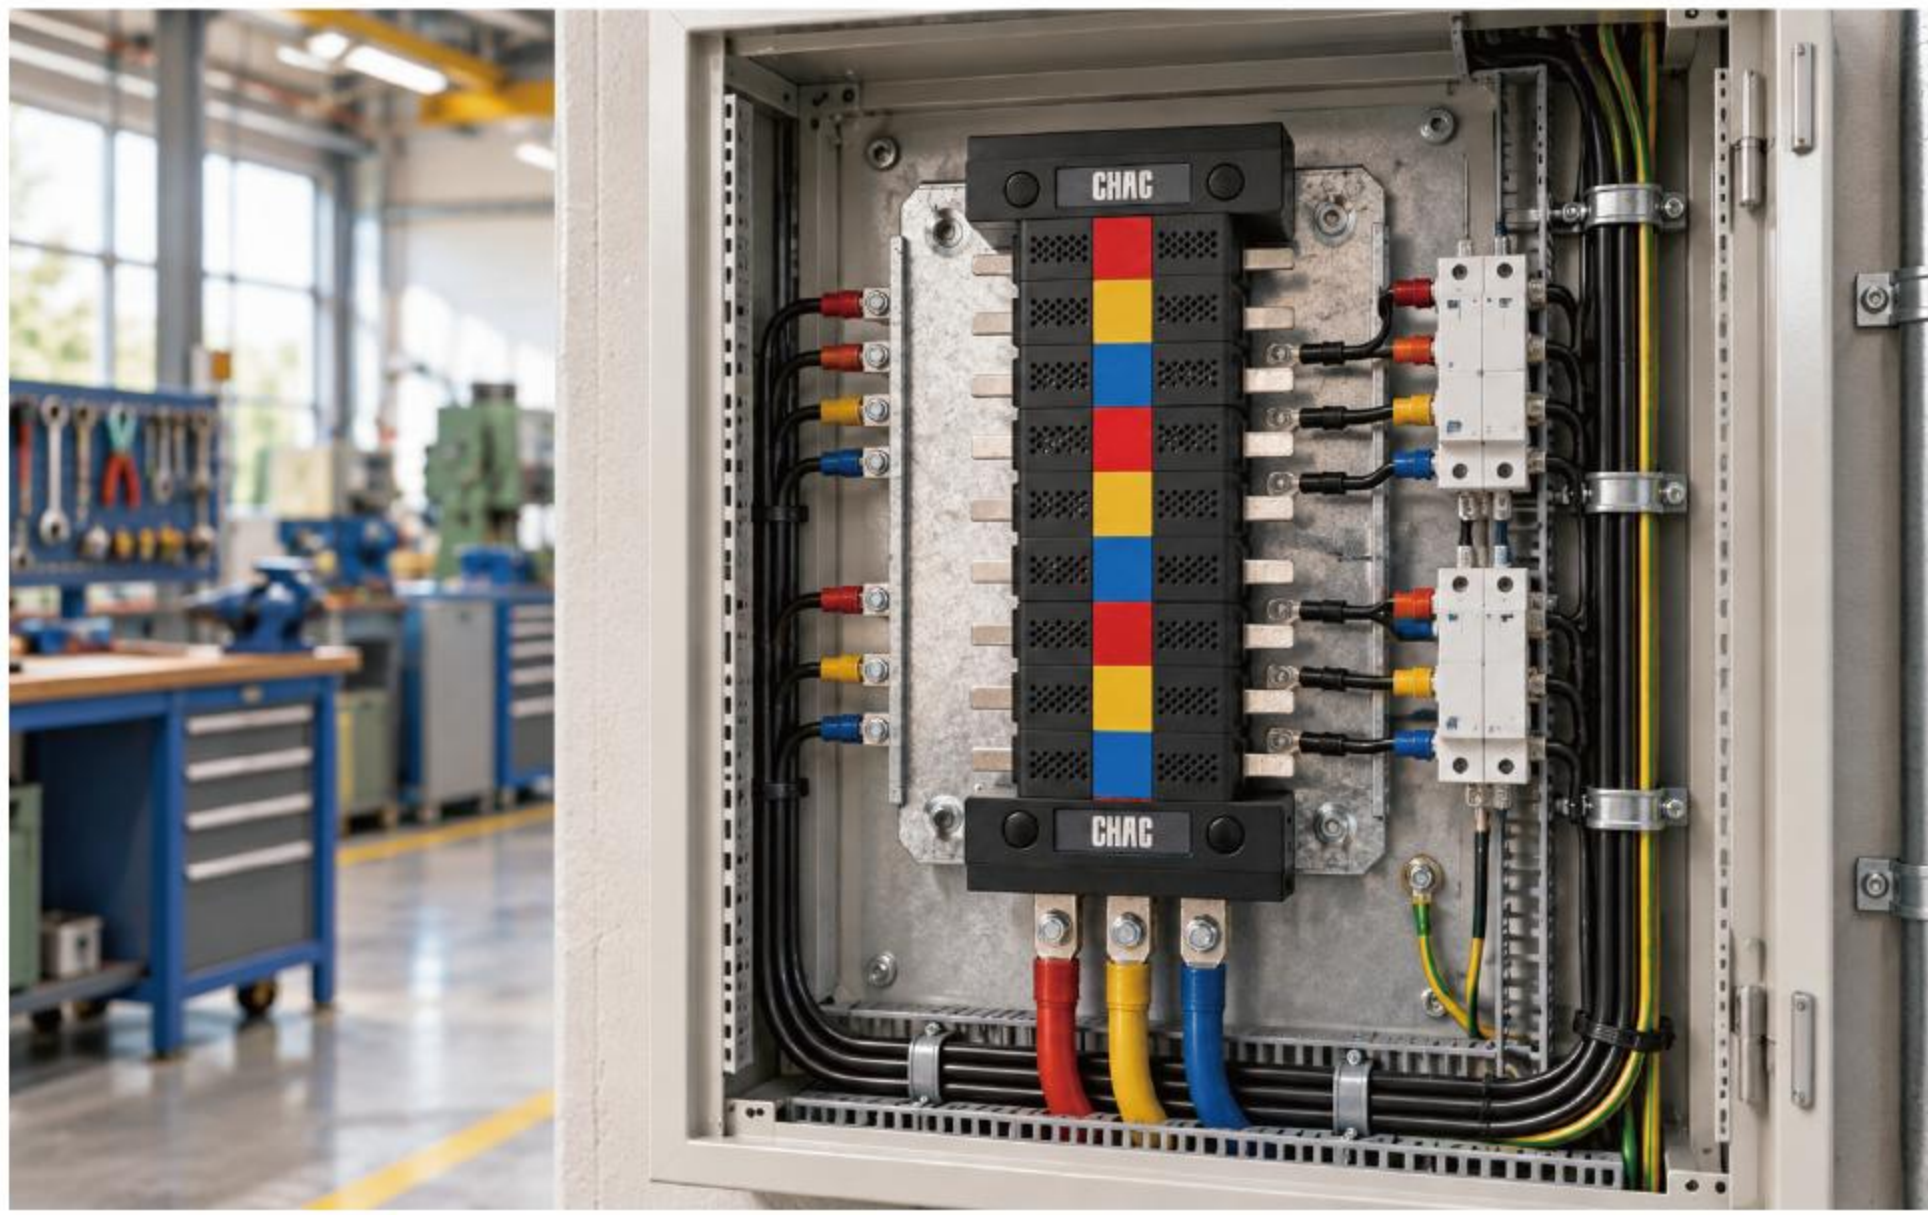

04 High-Capacity Model

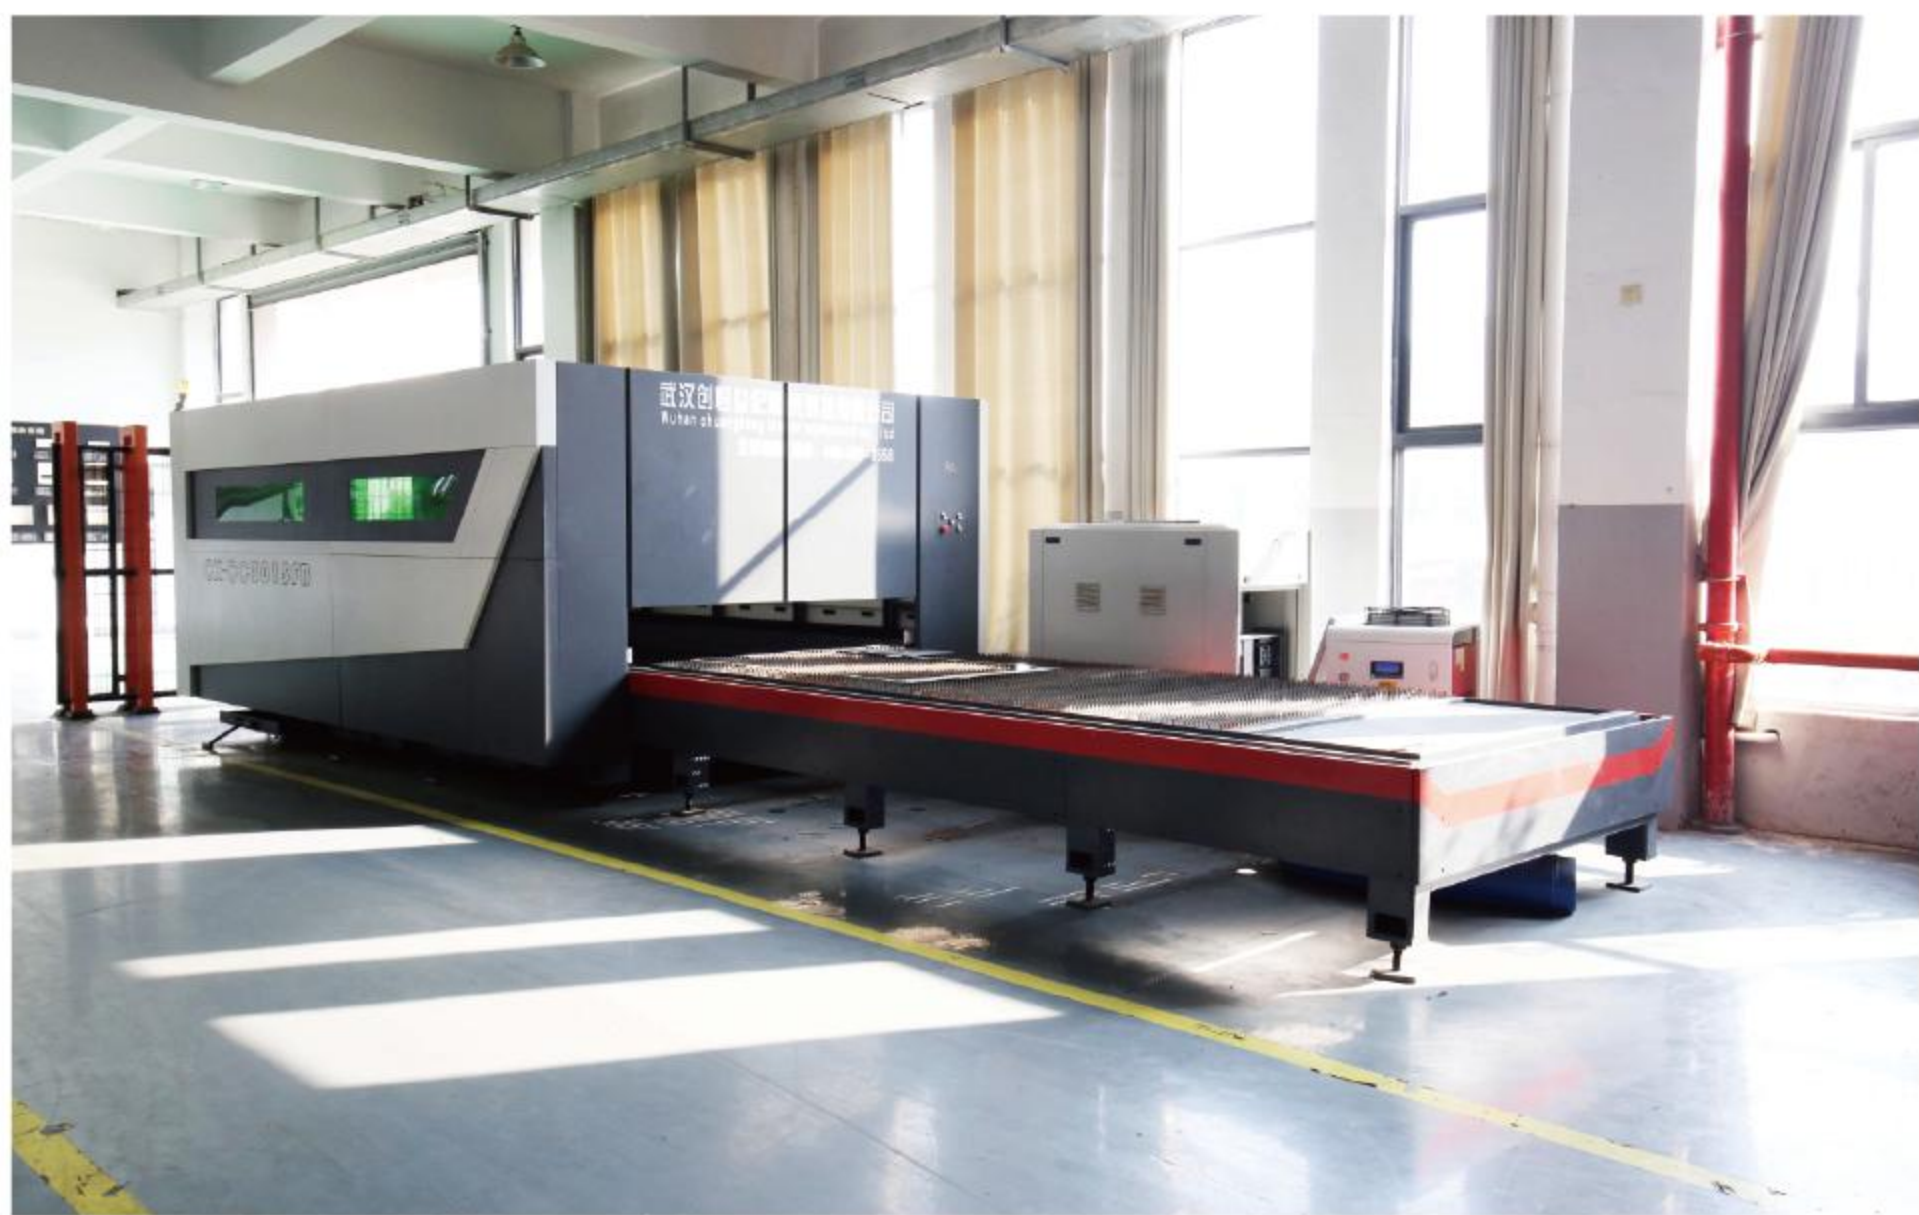

400A Enclosure: 580 × 550 mm

400A high-capacity distribution box with MCCB-based configuration. Built for larger loads, stronger protection and stable power distribution performance.

Modular Distribution Box Solutions for Middle East Projects

Manufacturing & finishing

Terminal electrical product range

Power distribution product range

CHAC offers complete modular distribution box solutions for low-voltage power distribution projects in the Middle East market.

With in-house manufactured MCCBs, MCBs, modular protection devices and distribution box production capabilities, we provide a complete solution from core components to finished distribution boxes.

Flexible current ratings, circuit layouts and internal configurations can be tailored to different project needs.

From component manufacturing and enclosure production to assembly, labeling and brand requirements, CHAC helps customers build reliable distribution box solutions for local markets.
